Capabilities: We offer full service veterinary care. General small animal veterinary practice includes outpatient clinic, annual exams, and immunizations. Medical and surgical services include routine elective surgery (ovariohysterectomy [spay], castration, and prophylactic dentistry [cleaning]), radiographic examinations, in-house blood work, and general surgery (soft tissue and orthopedic). Medical and surgical services require consultation with one of our staff veterinarians.

Limitations: Due to our level of staffing and other military obligations, the Stuttgart VTF is unable to provide 24 hour emergency care with in-patient critical care hospitalization. Emergencies seen during duty hours are stabilized and referred to civilian host nation veterinary facility that can provide in-patient care.

Access: Sick call, vaccination, and surgery/dental visits are by appointment only, usually scheduled for Tuesday, Wednesday, or Thursday. Over the counter sales are available during any of these hours. We are closed for all US Holidays. We are also closed the last business day of the month in the afternoon for inventory.

Referrals: Patients may be referred to local specialists or to the 51st Medical Detachment (VM) at the Pulaski Veterinary Treatment Facility in Kaiserslautern. The clinic will assist in coordinating these referrals.

Emergency Care: Emergencies are seen during duty hours, depending on availability of the veterinarians. After hours emergencies should seek care from a veterinarian off base. A list of local veterinarians is posted outside the clinic and below.
